

Type. Two miles south of Cameron, Coconino County, Arizona, June 10, 1939, *L. N. Goodding Sel. 34-39* (Rocky Mountain Herbarium; isotype, Missouri Botanical Garden).

This species may be referred to section *Preusii* of Jones (Rev. Astrag. 1923) and to the genus *Jonesiella* of Rydberg (N. Am. Fl. 24: 401. 1929). The elongated, straight, cylindrical, sessile or subsessile pods and the dark purple flowers, as well as the erect many-stemmed growth from a strong taproot will readily distinguish it from any of its near relatives. It appears to be very limited in distribution, being found only in the type locality as far as is known, but there it is quite abundant and conspicuous.

The writer takes pleasure in naming this plant for Professor O. A. Beath who first discovered it while on a field trip in connection with his work on seleniferous plants. Since he was unable to obtain mature fruit at the time he first saw it, he informed Mr. L. N. Goodding of the locality and it was through Mr. Goodding that the type material was later obtained.

University of Wyoming,
Laramie, January 24, 1940.

ALBERT RADDIN SWEETSER

(1861-1940)

In the death of Dr. Albert Raddin Sweetser the Pacific Coast has lost one of its best-loved teaching botanists. Dr. Sweetser was born at Mendon, Massachusetts, July 15, 1861, the son of a Methodist minister. His early education was obtained in Massachusetts, in the public schools and at Wilbraham Academy. Entering Wesleyan University, Middletown, Connecticut, in 1880 he received from that institution the degree of Bachelor of Arts in 1884 and of Master of Arts in 1887. Then followed a year at Massachusetts Institute of Technology, where he took special work in chemistry. His first teaching was done in the public schools, Cape Cod, and later at Bucksport, Maine, where he taught in a Methodist seminary. While at Bucksport, in 1888, he was married to Carrie K. Phinney, whom he had met on Cape Cod. His next teaching position was in a Methodist school at Tilton, New Hampshire. In 1893 he entered the Harvard Graduate School of Botany, and remained there for four years. During his last two years at Harvard he was an assistant in botany and at the same time was teaching in Radcliffe College. In 1897 he accepted an invitation to join the faculty of Pacific University at Forest Grove, Oregon. He went to the University of Oregon in 1902 as Professor of Biology, and in 1909 became head of the Department of Botany, a position he occupied until his retirement in 1931. In that year the faculty of the University of Oregon conferred upon him the honorary degree of Doctor of Science.
